

Wisconsin's Trauma-Informed Care Mapping Effort

The Wisconsin Children's Mental Health Collective Impact Trauma-Informed Care Action Team is tracking the many efforts to make Wisconsin trauma-informed. The purpose of this initiative is to identify the many agencies doing trauma-informed care work, to track opportunities for agencies to learn from each other, and to better spread the culture change required to become a trauma-informed state.

Below you will find the link to a brief (5 minute) survey requesting information about your trauma-informed efforts. By completing this survey, **you will help the collaborative effort to align and enhance trauma-informed work in Wisconsin.** The information collected will be used to identify where additional supports may be helpful in implementing trauma-informed care across Wisconsin, not to grade them on their progress. Please complete this information by March 20, 2017 so that we may publish the map of trauma-informed agencies in Wisconsin.

How to participate:

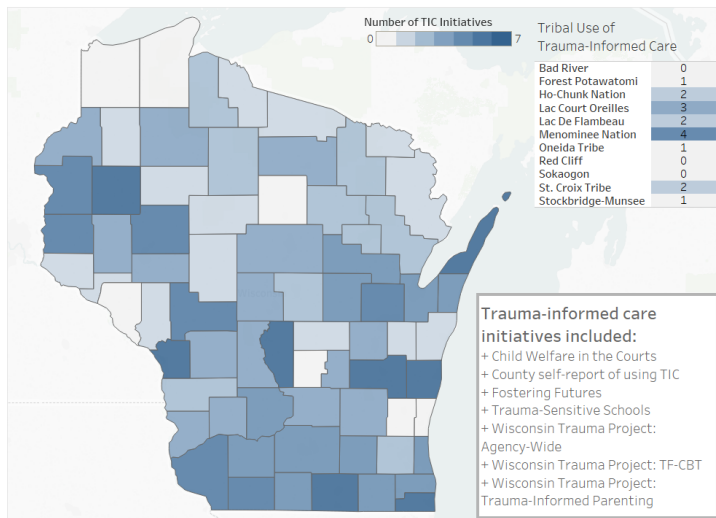

1. **Identify** your organization's point person who will take the lead in answering the survey.
2. **Fill out the survey** at: bit.ly/wi-tic-map
3. **Review** the state-wide results in our map: <https://children.wi.gov/Pages/Integrate/TICMap.aspx>
4. **Pass this information on** to your networks and partners.

Trauma-Informed Care Initiatives Across Wisconsin

Darker blue indicates a higher number of initiatives.

Who should participate:

- **Organizational leadership** with knowledge of the trauma transformation happening within the organization
- Internal TIC coaches and/or trauma champions
- **Only one member per agency, organization, or unit** (if trauma-informed care is being implemented differently across an agency)
